Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3753

Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

There is no proper antecedent basis for "the bottom plate" recited in claim 10.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Carter.

Note that Carter employs an odd number of nested coils.

Claims 1, 3-6, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Gerstmann.

Note that the innermost coil 40 of Gerstmann is connected to "outer"¹ coil 42 at return bend 56, where the coil diameter is smallest. Note that fins 38 dictate a minimum spacing between nested coils. Claim 5 merely recites an inherent property of any nested conical coils, i.e. the diameter of the space between coils gradually reduces, concurrent with the coil diameter reduction.

Art Unit: 3753

Regarding claim 6, note members 60 and 62 of Gerstmann, and see lines 36-48 of column 3. Regarding claim 9, note blower 28 and duct 26 associated with the lower, large diameter end of the nested coils.

Claim 10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The remaining claims of record show various heat exchange coil arrangements with nested conical coils.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen J. Flanigan whose telephone number is (703) 308-1015. The examiner can normally be reached on M-F 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Scherbel can be reached on (703) 308-1272. The

¹ Claim 42 is readable on the claimed "outer" pipe, notwithstanding the showing of additional coils 44, 46 outward of coil 42, due to the use of the word "comprising" in the claim, which is a nonexclusive term.
